

COLLECT MORE REVENUE AND REDUCE HIPAA RISK WITH ROI+

PATIENT RECORDS – A HIDDEN COST

Providing copies of patient records is a financial and risk burden on your practice. It's labor intensive and if not done correctly can result in substantial fines and loss of patient trust. Collecting revenue can be complicated due to the variable rate structure for billing for copies.

Spectrum Information Services, NW Inc.'s ROI+ solution automates the release process and dramatically reduces risk. Our electronic solution allows requests to be efficiently managed and fulfilled while providing a HIPAA compliant delivery method.

ROI+ automatically calculates the maximum billable amount for each request and generates an invoice for the requester. ROI+ also creates the HIPAA required disclosure log and maintains all release data for 7 years as mandated by HIPAA.

ROI+ helps you get rid of paper, reducing costs for paper, toner, postage fees, and wear and tear on copy machines.

THE BENEFITS

- Records requests are fulfilled faster, reducing annoying and time wasting calls from requestors.
- Free up staff to focus on revenue generating activities.
- Stop making paper copies of records that are already electronic in your EMR.
- Payments are collected before records are released.
- Easy to use credit card payment mechanism.
- Extensive reporting capabilities.
