

Spectrum Information Services NW, Inc.[®]

Healthcare Services Overview

Spectrum Information Services NW, Inc. is the Northwest's leading provider of scanning services and solutions for automating medical practices and business operations.

Medical Records Scanning - Our HIPAA compliant scanning process is fast, accurate, and affordable. Our five step process includes "every page" quality control and ensures high quality results so that records are legible and accurately identified.

EMR Conversions – Adopting a new electronic medical records system typically requires a migration of existing patient records from your old system. We offer an affordable option to the often exorbitant fees that EMR vendors charge for this service.

Medical Lockbox – We provide same day deposit of payments and a digital repository for storing check images, EOB forms, payment coupons, and any other documentation related to payments. All EOB forms are completely searchable so that you can instantly locate any information you need. Paper EOB forms and patient payment coupons can be converted to a standard 835 EFT file for auto-posting.

Release of Patient Information - Our electronic ROI solution automates the request and fulfillment process. Our service reduces the possibility of HIPAA breaches and provides a mechanism to easily collect all allowable revenue for providing copies of patient records from requestors. Our secure portal makes it easy to fulfill ROI requests and invoice the customer. Requests aren't released until payment is received and there is a complete audit trail to satisfy HIPAA requirements. Our service reduces copying and other labor expenses. We also offer a solution for taking over and providing access to patient records for medical providers that are closing their practice or retiring.

General Document Conversion Services – Conversion of HR, Payroll, GL, AP, documentation from paper, film, oversize drawings etc. We also provide mailroom automation solutions to automate workflow processes like Accounts Payable, Claims Processing, Loan Applications, etc. and cloud based document management solutions. Our mailroom solutions eliminate staff labor, ensure that you don't get behind, and we can also help reduce or eliminate data entry associated with processing payments, invoices, and more.
